by an iron pin

Allen J. & Gretchen A. Griffith
Vol. 329 Pg. 118

stone
corner used
.72' Believed to be
proper corner

Note: $334.29 \div 1334.55 = 25.05\%$
The hereon signed author
believes the purpose of
this stone was to divide
this quarter quarter into
a "10" and a "30" acre parcel.
However that fact was
not caught in the survey
to the West hence it
was ignored, and totally
missed.
It creates no hardship
as $.72 \div 2 \times 1000.36 = 360.13$ sq. ft.
less than .01 acres. Every body
in this quarter quarter ends
up with more than his deed
calls for.

334.29'
